About Strucomix Sport

Cavalor Strucomix Sport is a fibre-rich muesli for active horses. It contains long fibres which stimulate chewing and intestinal motility. Contains pre- and probiotics for the development of a healthy intestinal flora, providing the basis for natural resistance. With puffed cereals for good absorption and easy digestion. With essential multivitamins that supply the higher levels needed for horses that have to deliver serious performance. B-complex vitamins play a key role in energy management.

Cavalor Strucomix Sport is a level 2 feed for horses receiving regular, active training.

What makes Strucomix Sport unique?

For active horses

Feed for horses that are trained regularly and actively.

Optimal gut health & immunity

Probiotics promote good digestion. Probiotics stimulate the development of good intestinal flora. Intestinal flora plays a vital role in controlling and regulating the immune system. It protects the body against the "harmful" outside world. This is why it is vital to maintain healthy intestinal flora to ensure the best possible state of health and performance.

Sport essential multi-vitamins

Vitamins can help improve performance by giving a bit of a boost. Vitamin E protects muscle cells against free radicals and supports the natural functioning of the immune system. B-complex vitamins (thiamin, riboflavin, calcium D-pantothenate, pyridoxine hydrochloride, choline chloride, niacin, cyanocobalamin, folic acid and biotin) play a key role in energy levels or contribute to improved metabolism of carbohydrates, nerve signals or the supply of oxygen to the muscles.

Extra fibers

Adding long fibre means that the horse has to chew for longer and increases saliva production. Saliva is not the only benefit of chewing longer. It also causes natural tooth wear, alleviates boredom and ensures that the feed is consumed more slowly. Long fibres also promote intestinal motility, which improves digestion.

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Cavalor Strucomix Sport

We recommend a minimum of 250 g to maximum 450 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 1.5 kg and a maximum of 2.7 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage.

Composition

Linseed husks / Alfalfa pellet / Sunflower seed meal / Alfalfa stems / Spelt hulls / Oat hulls / Soya oil / Teff pellets / Peas / Beet molasses / Linseed / Dried beet pulp / Monocalcium phosphate / Sodium chloride / Coconut fat / Calcium carbonate / Fructo-oligosaccharides

Nutritional value	Quantity
NE EWpa (CVB)	0,86 EWpa/kg
