HARMONY

About FiberBase Mix

Cavalor FiberBase Mix is a muesli for healthy horses full of vitality. With flaked cereals, much easier to digest than unprocessed cereals. Oat-free formula. With fiber to help meet the fibre and energy requirements.

Cavalor FiberBase Mix is a level 1 feed for horses receiving recreational to light training.

What makes FiberBase Mix unique?

No oats

Oats are a cereal that can be used as an energy source in a muesli for competition horses. It quickly releases lots of energy. This is not needed for recreational horses, or for horses who do not need high energy levels.

With flaked cereals

With flaked cereals for easy digestion. Flaked cereals are much easier to digest than unprocessed cereals.

With fiber

The basis of a horse's diet is roughage. Feeding a fibre-rich muesli, in addition to sufficient roughage, helps to meet its fibre and energy requirements.

Advies

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Cavalor FiberBase Mix

We recommend a minimum of 400 g to maximum 700 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 2,4 kg and a maximum of 4,2 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage.

TIP

Not all feed scoops are the same size. Weigh the contents of your feed scoop so that you know exactly how much your horse is getting.
