20 KG

BREEDING

About Probreed Pellet

Cavalor Probreed Pellet is a pellet for pregnant and lactating mares and foals under one year old. This mix supports the good development and balanced growth of foals and keeps mares in good condition.

The right calcium/phosphorus/magnesium ratio ensures good bone development and density. The ideal combination of organic copper, zinc and manganese ensures good development of bones, joints and tendons.

What makes Probreed Pellet unique?

Steady Growth

It is vital to focus on gradual growth during the development from foetus into a young horse. Uneven growth spurts (whether too slow or too fast) pose the largest risk factors in terms of development problems and orthopaedic disorders. The right ratio and combination of nutrients, both as building blocks and energy providers which are also easily digestible, form the basis for gradual growth.

Breeding essential multi-minerals

The right calcium/phosphorus/magnesium ratio ensures good bone development and density. The ideal combination of organic copper, zinc and manganese ensures good development of bones, joints and tendons.

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Probreed Pellet

Gestation: we recommend a minimum of 250 g to maximum 500 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 1.5 kg and a maximum of 3 kg per day.

Lactation: we recommend a minimum of 375 g to maximum 625 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 2.25 kg and a maximum of 3.75 kg per day.

Foal: we recommend a minimum of 250 g to maximum 450 g per 100 kg adult body weight per day. For a horse with a adult weight of 600 kg this means a minimum of 1.5 kg and a maximum of 2.7 kg per day.

Divide the concentrate feed over several portions per day, preferably after feeding roughage.

Composition

Wheat bran / Barley / Alfalfa / Sunflower seed meal / Rape seed meal / Maize / Broken maize / Linseed / Beet molasses / Wheat middlings / Soya (bean) meal feed (produced from genetically modified soya) / Calcium carbonate /Maize steep liquor / Wheat / Sodium chloride / Soya oil

Nutritional value	Quantity
NE EWpa (CVB)	0.8 EWpa/kg
VREpa (CVB)	126 g/kg
DE (NRC)	10.77 MJ/kg
DE USA (NRC)	2.79 Mcal/kg

Analysis	Quantity	Vitamins and trace elements	Quantity (addition per kg)
Crude protein	16%	Vitamin A (3a672a)	13250 IU
Crude fat	4.5%	Vitamin D3 (3a671)	1525 IU
Crude ash	8%	Vitamin E (3a700)	250 mg
Crude fibre	8.5%	Vitamin B1 (3a821)	5.25 mg
Sugars	6.09%	Choline chloride (3a890)	69 mg
Starch	23.69%	Iron (3b103)	40 mg
Calcium	1.2%	Iodine (3b202)	0.35 mg
Magnesium	0.35%	Cobalt (3b304)	0.135 mg
Phosphorus	0.66%	Cobalt (3b405)	30 mg
Sodium	0.3%	Cobalt (3b413)	10 mg
		Manganese (3b503)	84 mg
		Manganese (3b506)	10 mg
		Zinc (3b603)	19 mg
		Zinc (3b605)	74 mg
		Zinc (3b607)	13.5 mg
		Selenium (3b801)	0.473 mg
		Selenium (3b815)	0.3 mg

Technological additives	Quantity (addition per kg)
Ammonium propionate (1k284)	980 mg
