# About Action Pellet

**Cavalor Action Pellet is a pellet for active horses.  
The extra large 10mm pellet promotes chewing.**

Cavalor Action Pellet is a level 2 feed for horses receiving regular and active training.

## What makes Action Pellet unique?

**For active horses**

Feed for horses that are trained regularly and actively.

**Big pellet  
Stimulates chewing**

The extra large 10mm pellet promotes chewing. The number of chewing motions is determined by the diameter of the grain. More chewing supports natural tooth abrasion. Large pellets are consumed more slowly.

## Advice

### Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

### Feeding recommendations for Cavalor Action Pellet

We recommend a minimum of 450 g to maximum 700 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 2,7 kg and a maximum of 4,2 kg per day.

Divide the concentrate feed over several portions per day, preferably after feeding roughage.

### TIP

Not all feed scoops are the same size. Weigh the contents of your feed scoop so that you know exactly how much your horse is getting.

## Composition

Alfalfa / Barley / Wheat middlings / Wheat / Wheat bran / Spelt hulls / Beet molasses / Broken oil seeds / Soya meal (produced from genetically modified soya) / Linseed / Rice bran / Dried beet pulp / Calcium carbonate / Fructo-oligosaccharides / Sodium chloride

Nutritional value	Quantity
NE EWpa (CVB)	0.85 EWpa/kg
VREpa (CVB)	87 g/kg
DE (NRC)	10,65 MJ/kg
DE USA (NRC)	2.44 Mcal/kg

Analysis	Quantity	Vitamins and trace elements	Quantity (addition per kg)
Crude protein	12.0%	Vitamin A (3a672a)	15000 IU
