

POW'RED PERFORMANCE

FOR ENERGY AND VITALITY

1. RECOMMENDED USE

Cavalor Pow'Red Performance ensures vitality and stamina by supporting the production and circulation of red blood cells.

Cavalor Pow'Red Performance is a delicious feed supplement that helps horses develop more endurance. It contains specially selected vitamins and easily digestible forms of iron to boost red blood cell levels. This gets more oxygen to the muscles, allowing the horse to utilise energy more effectively. Cavalor Pow'Red Performance also promotes regeneration and optimum vitality.

2. PRODUCT PROPERTIES – KEY INGREDIENTS

Young horses or sport horses that have just started training (recovered from an injury, after a rest period, etc.) are often quickly tired and need a lot of time to develop a good basic condition. To support them optimally in this development, there is Cavalor Pow'Red Performance.

This liquid feed supplement is high in vitamins and minerals which, although not direct sources of energy, target specific tissues and systems in the body to provide better energy transport, promote speedy recovery after intense exertion, and support the immune system. Each substance thus contributes to providing the horse with the energy for top performance.

- **Iron glycinate:** helps elevate the number of red blood cells (needed for transporting oxygen in the body) without the dreaded side effect of excess freely circulating iron which can lead to muscle problems.
- **Copper glycinate:** helps to prevent swollen joints and joint ailments.
- **Zinc glycinate:** promotes a healthy coat and boosts resistance to fatigue.
- **Manganese glycinate:** supports muscle function.
- **Selenised yeast *Saccharomyces cerevisiae*, inactivated - Selenium** together with **Vitamin E** helps to protect muscles from damage leading to stiffness, and promotes muscle recovery.
- **Betaine** improves regeneration following strenuous exertion and reduces the risk of muscle fatigue.
- **B Vitamins**, including B1, B2, B3, B6, B11, and B12, are responsible for efficient energy transport, blood cell production and proper metabolic processes.
- **Calcium D-pantothenate** promotes good cellular respiration.
- **Choline** protects the liver and promotes healthy digestion.
- **Vitamin C** boosts the body's immune system.

The trace elements Fe, Cu, Zn, and Mn are added in chelate form which allows them to bind to the amino acid glycine and facilitates their absorption. Selenium binds to an organic excipient for better bioavailability, allowing for noticeable results with a relatively small dosage. Vitamin C binds to minerals, making it much more stable and less aggressive towards the liver.

Hard-working sport horses critically need more Vitamin B than they get through their feed. Most feeds contain sufficient amounts of Vitamin A and Vitamin D. Cavalor Pow'Red Performance is relatively low in vitamins A and D3, making it the ideal feed supplement for sport feeds during intense work phases.

ENERGY & PERFORMANCE

Vitamin A → 250,000 IU/kg	Vitamin B6 → 500 mg/kg	Betaine → 3,000 mg/kg
Vitamin D3 → 50,000 IU/kg	Vitamin B12 → 2,900 µg/kg	Iron (Fe) → 10,000 mg/kg
Vitamin E → 8,000 mg/kg	Calcium D-pantothenate → 3,600 mg/kg	Copper (Cu) → 1,100 mg/kg
Vitamin B1 → 1,500 mg/kg	Vitamin C → 20,000 mg/kg	Zinc (Zn) → 5,500 mg/kg
Vitamin B2 → 1,200 mg/kg	Folic acid (B11) → 500 mg/kg	Manganese (Mn) → 4,000 mg/kg
Vitamin B3 → 3,000 mg/kg	Choline chloride → 3,000 mg/kg	Selenised yeast <i>Saccharomyces cerevisiae</i> , inactivated - Selenium → 8 mg/kg

3. INSTRUCTIONS FOR USE

Administer Cavalor Pow'Red Performance to improve vitality and stamina.

Ponies and leisure horses: 25 ml/day

Sport horses: 50 ml/day

Maximum quantity: 100 ml/day

Always give Cavalor Pow'Red Performance in a 40-day treatment. 1 bottle of 2 L = 1 treatment for sport horses

TIP: Administer Cavalor Pow'Red Performance if a blood analysis reveals low red blood cell counts.

We recommend Cavalor Pow'Red Performance for horses that lack basic condition. For sport horses that have a good basic condition but still need a physical boost during peak moments, we recommend Cavalor Peak Performance. This will give them that extra edge and help them to keep going.

4. PACKAGING AND STORAGE

Store in a dry place at moderate temperature.

Use within 18 months from production date.

EANCODE	PACKAGING	# DAYS
 5425016900529	Cavalor Pow'Red Performance 2 L - 67,6 fl.oz	40 or 80
 5425016900932	Cavalor Pow'Red Performance 5 L - 169 fl. oz	100 or 200
