# DERMA WASH

**Caring hygienic shampoo.  
Ideal for horses with sensitive and flaky  
skin, dull coat and/or skin conditions**

- › With pre- and probiotics
- › Promotes a healthy balance of microflora
- › Encourages the natural defense mechanism of the skin
- › Also cleans leather, saddle cloths and blankets

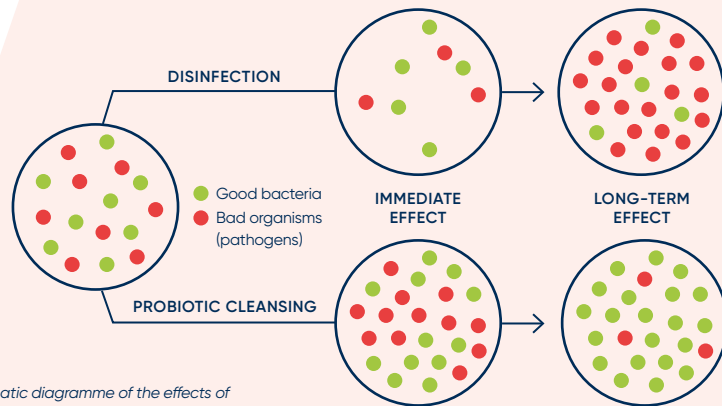

500 ML / 2L

SKIN CARE

# About Derma Wash

Schematic diagram of the effects of disinfection and probiotic cleansing.

Cavalor Derma Wash is a hygienic shampoo containing pre- and probiotics, used to wash horses that have flaky skin, dull coats or a skin condition. It's the ideal shampoo to wash new arrivals in the yard or to prepare your horse for clipping.

The skin is the first line of defense for your horse. Cavalor Derma Wash encourages the natural defense mechanism of the skin and promotes a healthy balance of microflora. It helps 'good' bacteria to gain a footing in the affected area and multiply more quickly and inhibits the adhesion of external organisms. This prevents and alleviates important skin problems.

## What makes Derma Wash unique?

1

**Boost the immunity with bacteria**

Cavalor Derma Wash contains a combination of pre- and probiotics that actively support the skin's resistance and healthy microflora. Various strains of the Bacillus species are added to the formula in spore form. This is a dormant form, which is activated as soon as it comes into contact with your horse's skin, textiles, leather, etc. The prebiotics also specifically stimulate the activation of these good bacteria so that they do not affect pathogens and bacillus bacteria for keeping working longer. This results in healthy microflora that protects the skin against external invaders.

2

**Caring hygienic shampoo without compromises**

Unlike traditional disinfectant shampoos, the horse's skin remains hydrated with Cavalor Derma Wash. Cavalor Derma Wash is pH neutral and therefore totally made for the equine skin. Products with a low pH, such as human shampoo, attract moisture and dehydrate the horse's skin, resulting in a dry, flaky skin. Products with a high pH (like strong cleansers) absorb the natural tallow making the coat dull and the skin dry, sensitive and susceptible to infections.

3

**So versatile**

Bacteria are everywhere, both the good and the bad kinds. Even if you can't see them, organisms can spread anywhere. Infections often pass from one horse to another via brushes, saddle cloths and sheets. Cavalor Derma Wash can be used to wash horses, it can also be used to clean brushes, saddle cloths and leather.

## Directions for use

Apply a small amount ( $\pm$  30 ml) of Cavalor Derma Wash in a pail of lukewarm water, and apply directly on the whole body or affected skin with a sponge. Let it soak for a short while and carefully rinse with water afterwards.

To avoid skin problems, it can be a good idea to wash the horse with Cavalor Derma wash monthly, or after intensive contact with other horses (camps or walks for instance).

Cavalor Derma Wash can also be used to disinfect your tack or other equipment. Use 30 ml of Cavalor Derma Wash in your washing machine instead of detergent to clean textile.

For microflora imbalances of the skin (itching, tears to skin in the fetlock area, wounds, skin problems, etc.), following up with Cavalor Derma Spray can be useful. Use Cavalor Derma Spray to clean wounds or genitals.

**Caution:** for external use only.

## Description

Apple blue sea green shampoo

## Composition

Micro-organismen / inulin / glycerin

## Storage

Keep out of reach of children If medical advice is needed, have product container or label at hand.

### TIP

Do you want to clip your horse? Wash him first with Cavalor Derma Wash, a pH-neutral shampoo that disinfects the skin without drying it out. This makes clipping easier and more efficient. Cavalor Derma Wash has added glycerol to condition the coat and skin.
