JUNIORIX

Feed for yearlings and young horses
up to 3 years old

- › Steady Growth
- › Optimal gut health & immunity
- › Breeding essential multi-minerals

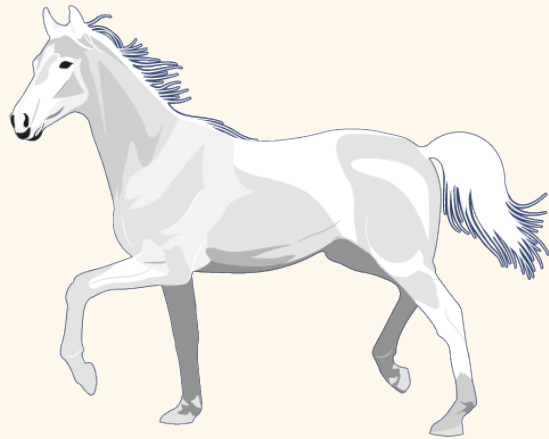

20 KG

BREEDING

About Juniorix

Cavalor Juniorix is a muesli for yearlings and young horses up to 3 years old.

The muesli promotes steady growth and development from yearling to adult horse. With puffed cereals for good absorption and easy digestion. Contains pre- and probiotics for the development of a healthy intestinal flora, providing the basis for natural resistance. The right calcium/phosphorus/magnesium ratio ensures good bone development and density. The ideal combination of organic copper, zinc and manganese ensures good development of bones, joints and tendons.

What makes Juniorix unique?

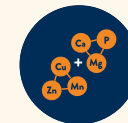

Steady Growth

It is vital to focus on gradual growth during the development from foetus into a young horse. Uneven growth spurts (whether too slow or too fast) pose the largest risk factors in terms of development problems and orthopaedic disorders. The right ratio and combination of nutrients, both as building blocks and energy providers which are also easily digestible, form the basis for gradual growth.

Optimal gut health & immunity

Probiotics promote good digestion. Probiotics stimulate the development of good intestinal flora. Intestinal flora plays a vital role in controlling and regulating the immune system. It protects the body against the "harmful" outside world. This is why it is vital to maintain healthy intestinal flora to ensure the best possible state of health and performance.

Breeding essential multi-minerals

The right calcium/phosphorus/magnesium ratio ensures good bone development and density. The ideal combination of organic copper, zinc and manganese ensures good development of bones, joints and tendons.

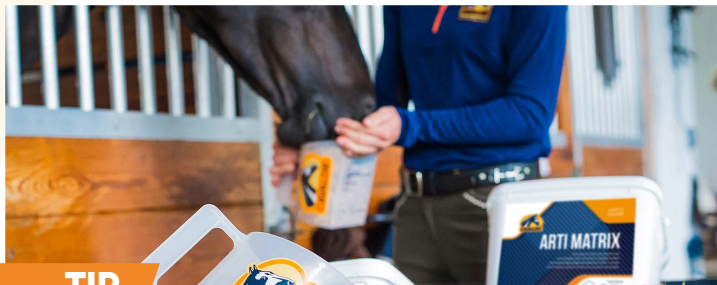

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Cavalor Juniorix

We recommend a minimum of 300 g to maximum 400 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 1.8 kg and a maximum of 2.4 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage.

TIP

Not all feed scoops are the same size. Weigh the contents of your feed scoop so that you know exactly how much your horse is getting.

Composition

Wheat middlings / Oats / Linseed husks / Wheat bran / Barley flakes / Puffed barley / Beet molasses / Puffed maize / Spelt hulls / Linseed / Broken oil seeds / Toasted soya beans / Soya bean hulls (produced from genetically modified soya) / Rape seed meal / Wheat / Sunflower seed meal / Brewer's yeast / Calcium carbonate / Fructo-oligosaccharides / Sodium chloride / Barley / Hydrated magnesium silicate / Soya oil / Maize steep liquor

Nutritional value	Quantity
NE EWpa (CVB)	0.81 EWpa/kg
VREpa (CVB)	94 g/kg
DE (NRC)	11.07 MJ/kg
DE USA (NRC)	2.89 Mcal/kg

Analysis	Quantity	Vitamins and trace elements	Quantity (addition per kg)
Crude protein	12.5%	Vitamin A (3a672a)	25000 IU
Crude fat	4.9%	Vitamin D3 (3a671)	2500 IU
Crude ash	7.6%	Vitamin E (3a700)	426.667 mg
Crude fibre	11.6%	Vitamin B1 (3a821)	2 mg
Sugars	5.6%	Choline chloride (3a890)	254.625 mg
Starch	24.5%	Iron (3b103)	116.667 mg
Calcium	1.06%	Iodine (3b202)	1.633 mg
Magnesium	0.35%	Cobalt (3b304)	0.43 mg
Phosphorus	0.64%	Copper (3b405)	74.667 mg
Sodium	0.3%	Copper (3b413)	15 mg
		Manganese (3b503)	204.667 mg
		Manganese (3b506)	15 mg
		Zinc (3b605)	204.667 mg
		Zinc (3b607)	20.25 mg
		Selenium (3b801)	0.75 mg
		Selenium (3b815)	0.95 mg

Technological additives	Quantity (addition per kg)
Ammonium propionate (1k284)	433 mg
