NUTRI FIBER

**Vitamin- and mineralbalancer
enriched with extra fiber**

- › Multi-vitamins and minerals
- › Very tasteful
- › Easily digestible & optimal gut health
- › High fiber

15 KG

BALANCER

About Nutri Fiber

Cavalor Nutri Fiber is a good-tasting high-fibre balancer with a complete mix of vitamins and minerals, making it an indispensable supplement to forage. It is specially developed for horses that are fed forage and little or no concentrates. Cavalor Nutri Fiber contains essential fibre, vitamins, and minerals as well as pieces of carrot and apple. Even the fussiest eaters love it. Cavalor Nutri Fiber is a delicious, wholesome mix that won't overload your horse with calories and energy.

Forage is the key ingredient of a horse's diet. That goes for all horses. A horse's requirement for concentrates depends on its workload. Horses in maintenance or at light work often get enough energy and protein from high-quality forage and do not need additional concentrates. They will need a balancer, however, because forage will not cover their total vitamin and mineral requirements. Cavalor Nutri Fiber is a balancer. Nutri Fiber has all the vitamins and minerals a horse needs, making it an essential supplement to rations that contain little or no concentrate feeds.

What makes Nutri Fiber unique?

Multi-vitamins and minerals

Cavalor Nutri Fiber contains covalently bonded hydroxy minerals (Cu, Zn) and chelated trace elements (Mn) for better absorbability and stability. Its vitamins and trace elements are provided in separate form to ensure stability. The green pellets contain vitamins and minerals, while the beige pellets contain trace elements. These two kinds of pellets are mixed so that each portion contains the right amount of each element.

Very tasteful

Cavalor Nutri Fiber is a balancer with concentrated vitamins and minerals. The separation of vitamins and trace elements ensures increased palatability. Delicious pieces of apple, carrot, carob and even pea make this mix extra tasty. Cavalor Nutri Fiber was tested on horses that are extremely picky eaters. All of them ate it with pleasure.

Easily digestible & optimal gut health

Nutri Fiber contains lucerne, Timothy grass, linseed husks, and oat hulls. These high fibre ingredients provide more structure and support healthy gut function to ensure healthy digestion and nutrient absorption. They also add volume, so that Nutri Fiber can be fed generously without adding extra calories. Delicious and wholesome.

High fiber

High in fibre, also known as crude fibre. Crude fibre is an indispensable pacesetter for the intestines and allows for a gradual release of energy. Moreover, a mix of high-quality and easily digestible fibre results in improved digestion and avoids gastrointestinal problems. The more fibre the feed contains, the longer the horse has to chew, which also increases saliva production. The intestinal micro-organisms also need crude fibre. Getting enough fibre is an essential part of maintaining healthy microflora. A healthy gut results in a healthy immune system – a basic requirement for a fit and happy horse.

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Cavalor Nutri Fiber

Cavalor Nutri Fiber as a balancer to add vitamins and minerals to rations that contain little or no concentrate feed. For horses that get only forage, we recommend giving your horse 100–200 g daily per 100 kg of body weight, depending on workload. If fed together with concentrate feed, the amount may be halved.

Work level	Only forage		Little concentrate	
	/ 100 kg BW	For a 500 kg horse	/ 100 kg BW	For a 500 kg horse
At maintenance	100 g	500 g	50 g	250 g
In light work	200 g	1000 g	100 g	500 g

Daily maximum for one horse 400 g per 100 kg BW.

Composition

Oat hulls / Lucerne / Timothy grass / Flax chaff / DDGS-maize / Film horse beans / Dried sugar beet pulp / Pea flakes / Carob / Wheat bran / Wheat middlings / Isomaltulose molasses / Carrot flakes / Dried apple / Monocalcium phosphate / Sodium chloride / Rapeseed oil / Calcium carbonate / Limestone / Yeast product / Magnesium oxide / Sugar cane molasses / Propylene glycol / Yucca extract / Sodium sulphate
