SPECIAL CARE

About Shine & Show

Cavalor Shine & Show is a muesli for show horses. Contains linseed, known for its Omega-3 fatty acids, which contribute to a shiny coat.

Probiotics promote the development of good intestinal flora. A healthy intestinal microflora is necessary to have a healthy, shiny horse. Essential multivitamins combine with minerals for a healthy coat (zinc, iodine, selenium, vitamin A and vitamin E) and play a key role in providing enough energy for competition horses (B-complex).

What makes Shine & Show unique?

Shiny coat

A well-balanced diet contributes to a healthy coat. Dietary deficiencies can result in poorer quality of skin and coat. Vitamins and minerals contribute to a healthy coat. Probiotics also promote the development of good intestinal flora. A healthy intestinal microflora is necessary to have a healthy, glossy horse. Linseed is known for its Omega-3 fatty acids, which contribute to a glossy coat.

Optimal gut health & immunity

Probiotics promote good digestion. Probiotics stimulate the development of good intestinal flora. Intestinal flora plays a vital role in controlling and regulating the immune system. It protects the body against the "harmful" outside world. This is why it is vital to maintain healthy intestinal flora to ensure the best possible state of health and performance.

Sport essential multi-vitamins

Vitamins can help improve performance by giving a bit of a boost. Vitamin E protects muscle cells against free radicals and supports the natural functioning of the immune system. B-complex vitamins (thiamin, riboflavin, calcium D-pantothenate, pyridoxine hydrochloride, choline chloride, niacin, cyanocobalamin, folic acid and biotin) play a key role in energy levels or contribute to improved metabolism of carbohydrates, nerve signals or the supply of oxygen to the muscles.

Advice

Feed as you need

The foundation of good nutrition for your horse is adequate roughage and access to fresh drinking water. Supplement this base with concentrates or a balancer depending on the individual nutritional needs of the horse. Use supplements to fine tune.

Feeding recommendations for Cavalor Shine & Show

We recommend a minimum of 450 g to maximum 700 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 2.7 kg and a maximum of 4.2 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage.

Composition

Wheat middlings / Alfalfa pellets / Maize flakes / Oats / Wheat bran / Barley flakes / Linseed husks / Linseed / Beet molasses / Toasted soya beans / Spelt hulls / Broken oil seeds / Soya oil / Soya hulls / Puffed barley / Puffed maize / Puffed wheat / Rape seed meal / Wheat / Spelt / Dried chicory pulp / Sunflower seed / meal / Fructo-oligosaccharides / Calcium carbonate / Sodium chloride / Hydrated magnesium silicate

Nutritional value	Quantity
NE EW _{pa} (CVB)	0.87 EW _{pa} /kg
VRE _{pa} (CVB)	96 g/kg
DE (NRC)	11.66 MJ/kg
DE USA (NRC)	2.82 Mcal/kg

Analysis	Quantity	Vitamins and trace elements	Quantity (addition per kg)
Crude protein	13%	Vitamin A (3a672a)	10600 IU
Crude fat	6.5%	Vitamin D3 (3a671)	1100 IU
Crude ash	7%	Vitamin E (3a700)	300 mg
Crude fibre	11%	Vitamin B1 (3a821)	12 mg
Sugars	5%	Vitamin B2 (3a825i)	13 mg
Starch	25.5%	Calcium D-pantothenate (3a841)	26 mg
Calcium	0.9%	Vitamin B6 (3a831)	2.4 mg
Magnesium	0.3%	Vitamin B12	0.03 mg
Phosphorus	0.6%	Biotin (3a880)	0.2 mg
Sodium	0.3%	Choline chloride (3a890)	260 mg
		Iron (3b103)	50 mg
		Copper (3b405)	35 mg
		Copper (3b409)	6 mg
		Zinc (3b605)	93 mg
		Zinc (3b609)	15 mg
		Manganese (3b503)	113 mg
		Manganese (3b506)	15 mg
		Iodine (3b202)	1.25 mg
		Cobalt (3b304)	0.3 mg
		Selenium (3b801)	0.24 mg
		Selenium (3b815)	0.21 mg

Zootecnological additives	Quantity (addition per kg)
Saccharomyces cerevisiae CNCM 1-4407 (4b1702)	5,2x10 ⁹ CFU

Technological additives	Quantity (addition per kg)
Ammonium propionate (1k284)	371,2 mg
