STRUCOMIX SPORT

Fiber rich feed for active horses

- › For active horses
- › Optimal gut health & immunity
- › Sport essential multi-vitamins
- › With extra fibers

20 KG

SPORT

About Strucomix sport

Cavalor Strucomix Sport is a fibre-rich muesli for active horses. It contains long fibres which stimulate chewing and intestinal motility. Contains pre- and probiotics for the development of a healthy intestinal flora, providing the basis for natural resistance. With puffed cereals for good absorption and easy digestion. With sport essential multi-vitamins that supply the higher levels needed for horses that have to deliver serious performance. B-complex vitamins play a key role in energy management.

Cavalor Strucomix Sport is a level 2 feed for horses receiving regular, active training.

What makes Strucomix Sport unique?

For active horses

Feed for horses that are trained regularly and actively

Optimal gut health & immunity

Probiotics promote good digestion. Probiotics stimulate the development of good intestinal flora. Intestinal flora plays a vital role in controlling and regulating the immune system. It protects the body against the "harmful" outside world. This is why it is vital to maintain healthy intestinal flora to ensure the best possible state of health and performance.

Sport essential multi-vitamins

Vitamins can help improve performance by giving a bit of a boost. Vitamin E protects muscle cells against free radicals and supports the natural functioning of the immune system. B-complex vitamins (thiamin, riboflavin, calcium D-pantothenate, pyridoxine hydrochloride, choline chloride, niacin, cyanocobalamin, folic acid and biotin) play a key role in energy levels or contribute to improved metabolism of carbohydrates, nerve signals or the supply of oxygen to the muscles.

With extra fibers

Adding long fibre means that the horse has to chew for longer and increases saliva production. Saliva is not the only benefit of chewing longer. It also causes natural tooth wear, alleviates boredom and ensures that the feed is consumed more slowly. Long fibres also promote intestinal motility, which improves digestion.

Advice

Feed as you need

For good nutrition, your horse needs roughage (and a constant supply of fresh drinking water). This foundation can be supplemented with a balancer or concentrate feed as needed. Fine-tune your horse's diet with supplements.

Feeding recommendations for Cavalor Strucomix Sport:

We recommend a minimum of 250 g to maximum 450 g per 100 kg body weight per day. For a 600 kg horse this means a minimum of 1.5 kg and a maximum of 2.7 kg per day. Divide the concentrate feed over several portions per day, preferably after feeding roughage.

Composition

Alfalfa pellet, linseed husks, puffed maize, puffed barley, wheat middlings, soya meal (produced from genetically modified soya), alfalfa stems, timothy, soya oil, linseed, carrot chunks, toasted soya beans, rape seed meal, wheat bran, spelt hulls, beet molasses, broken oil seeds, sunflower seed meal, sodium chloride, soya bean hulls (produced from genetically modified soya), linseed, wheat, fructo-oligosaccharides, calcium magnesium carbonate, vinasse, maize steep liquor, maize gluten, sodium bicarbonate.

TIP

Not all feed scoops are the same size. Weigh the contents of your feed scoop so that you know exactly how much your horse is getting.

Nutritional value	Quantity
NE EWpa (CVB)	0.86 EWpa/kg
VREpa (CVB)	96,5 g/kg
DE (NRC)	12.63 MJ/kg
DE USA (NRC)	3.02 Mcal/kg

Analysis	Quantity
Crude protein	14 %
Crude fat	7 %
Crude ash	9 %
Crude fibre	20 %
Sugars	5.5 %
Starch	13 %
Calcium	1.2 %
Magnesium	0.3 %
Phosphorus	0.6 %
Sodium	0.3 %

Vitamins	Quantity (addition per kg)
Vitamin E (3a700)	444 mg
Vitamin B1 (3a821)	14,5 mg
Vitamin B2 (3a825i)	16 mg
Calcium-D-pantothenate (3a841)	30 mg
Vitamin B6 (3a831)	2,9 mg
Vitamin B12	0,03 mg
Biotin (3a880)	0,24 mg

Trace elements	Quantity (addition per kg)
Choline chloride (3a890)	315 mg
Iron (Iron(II) sulphate monohydrate) (3b103)	60 mg
Copper (Copper(II) sulphate pentahydrate) (3b405)	43 mg
Copper (Dicopper chloride trihydroxide)) (3b409)	7,2 mg
Zinc (Zinc sulphate monohydrate) (3b605)	115 mg
Zinc (Zinc chloride hydroxide monohydrate) (3b609)	18 mg
Manganese (Manganous sulphate monohydrate) (3b503)	138 mg
Manganese (Manganese chelate of glycine hydrate) (3b506)	18 mg
Iodine (Calcium iodate, anhydrous) (3b202)	1,57 mg
KCobalt (Coated granulated cobalt(II) carbonate) (3b304)	0,38 mg
Selenium (Sodium selenite) (3b801)	0,33 mg
Selenium (L-selenomethionine) (3b815)	0,26 mg

Zootechnical additives	Quantity (addition per kg)
Saccharomyces Cerevisiae CNCM 1-4407 (4b1702)	5,2x10 ⁹ CFU
Ammonium Propionate (1k284)	132 mg
