

NUTRI GROW

VITAMIN AND MINERAL SUPPORT FOR YOUNGSTOCK & BREEDING

1. RECOMMENDED USE

Cavalor Nutri Grow bevat alle voedingsstoffen die de drachtige merrie en het veulen nodig hebben voor een optimale ontwikkeling.

Voor merries en jonge paarden die geen specifieke fokkerijmengeling of helemaal geen krachtvoeder krijgen, raden we aan om Cavalor Nutri Grow bij te voederen om de merrie of het jonge paard te voorzien van alle nutriënten die zij nodig hebben voor goede ontwikkeling van veulen tot gezond volwassen paard.

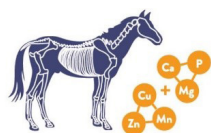

Ook al vindt de grootste groeispuurt van het veulen plaats tijdens de laatste 3 maanden van de dracht, toch stijgt de behoefte aan bepaalde nutriënten voor de merrie al een stuk eerder. Er wordt aangeraden om een rantsoen hoger in bijvoorbeeld calcium, fosfor, koper, jodium, ... te gebruiken vanaf de 7de maand van de dracht. Een tekort aan koper kan bijvoorbeeld zorgen voor bot- en gewrichtsproblemen. Voldoende vitamines en mineralen voederen is van cruciaal belang voor botontwikkeling, energie transport en ondersteunen van cel functies. Vanaf het eerste levensjaar heeft het jonge paard een verhoogde behoefte voor bijvoorbeeld koper, zink en mangaan.

2. PRODUCTEIGENSCHAPPEN – BELANGRIJKE INGREDIËNTEN

Cavalor Nutri-Balance Concept as a supplement to high-energy roughage

Broodmares and young horses are often turned out to pasture. This is very important for their development and their well-being. Often, pasture grass is high in energy and protein, but low in vitamins and minerals. Cavalor Nutri Grow is formulated to meet the vitamin and mineral needs of young horses and pregnant or nursing mares without additional energy and protein. It is ideal as a balancer if the horse receives only roughage or less than the recommended amount of commercial breeding feed.

Cavalor Nutri-Mobility Concept for strong, solid bones and flexible joints

STRONG BONES & FLEXIBLE JOINTS

The skeleton of an unborn foal needs optimum conditions for healthy development. Healthy bone density is essential for the development of strong limbs after the foal is born. Nutri Grow is part of the Cavalor Nutri-Mobility Concept: an optimum balance of calcium, phosphorus, and magnesium for bone growth and good bone density supplemented by easily absorbed organic trace elements - copper, zinc, and manganese - to ensure the healthy development of bones, cartilage, joints, and tendons. In addition, the essential amino acids methionine, lysine, cystine, threonine and tryptophan ensure healthy development. Nutri Grow supports the controlled and even transformation of cartilage into strong and solid bone.

Absorbability, availability and stability as characteristic features

Nutri Grow contains calcareous marine algae, a natural and highly absorbable source of calcium and magnesium. This all-natural ingredient ensures the development of strong bones and has very positive effects on the gastrointestinal tract. Mojave yucca also boosts absorption of minerals and trace elements.

Chelated trace elements were selected as they can be better absorbed and remain more stable. The vitamins and trace elements in Cavalor Nutri Grow are provided in separate pellets to ensure optimum stability. This prevents them from interacting with one another. The green pellets contain vitamins and minerals, whilst the light brown pellets contain trace elements. The pellets are mixed in equal amounts to provide your horse with the right amount of each.

BREEDING

Analytical constituents:

CRUDE ASH → 30.9%	CALCIUM → 6.0%	LYSINE → 1.0%
CRUDE PROTEIN → 14.5%	PHOSPHORUS → 2.5%	METHIONINE → 1.9%
CRUDE FAT → 4.0%	MAGNESIUM → 0.6%	CYSTINE → 0.19%
CRUDE CELLULOSE → 7.5%	SODIUM → 1.9%	THREONINE → 0.48%
	POTASSIUM → 0.8%	TRYPTOPHAN → 0.14%

Additives:

Vitamins	Trace elements
Vitamin A (3a672a) → 500,000 IU	Iron (ferrous sulphate, monohydrate) + (ferrous chelate of amino acids hydrate) → 2,000 mg
Vitamin D3 (3a671) → 50,000 IE	Zinc (zinc sulphate monohydrate) (3b605) + (zinc chloride hydroxide monohydrate, 3b609) → 6,500 mg
Vitamin E (3a700) → 5,500 mg	Manganese (manganese sulphate monohydrate, 3b503) + (manganese chelate of amino acids hydrate, 3b510) → 5,000 mg
Vitamin C (3a312) → 103 mg	Copper (copper sulphate pentahydrate, 3b405) + (dicopper chloride trihydroxide, 3b409) → 1,625 mg
Niacin (3a314) → 551 mg	Iodine (calcium iodate, anhydrous) (3b202) → 40 mg
Vitamin B3 (3a841) → 262 mg	Cobalt (coated granulate of cobalt carbonate) (3b304) → 12 mg
Vitamin B12 → 0.5 mg	Selenium (sodium selenite, 3b801) + (l-selenomethionine, 3b8.12) → 9.8 mg
Vitamin B2 → 133 mg	Technical additives
Vitamin B1 (3a821) → 28 mg	BHT (E321) → 160 mg
Vitamin B6 (3a831) → 28 mg	Propyl gallate (E310) → 50 mg
Vitamin K (3a711) → 70 mg	
Folic acid (3a316) → 26 mg	
Biotin (3a880) → 3 mg	
Choline chloride (3a890) → 6,000 mg	

BREEDING

3. INSTRUCTIONS FOR USE

- Foals and ponies: 100 g / day
- Young horses: 150 g / day
- Pregnant (in the last 5 months) and lactating mares: 200 g / day
- 1 spoonful = 100 g - Maximum amount per horse: 400 g / day

Tip: Cut dosage in half if the horse receives more than 1.5 kg of concentrate feed per day.

4. PACKAGING AND STORAGE

Close bucket properly after use. Keep out of reach of children and store in a cool, dry place.
Suitable for use within 1.5 years of the date of manufacture.

EANCODE	PACKAGING	# DAYS
 5425016900246	Cavalor® Nutri Grow 5 kg / 11 lbs	25 - 50
 5425016901984	Cavalor® Nutri Grow 20 kg / 44 lbs	100 - 200
