

REPELLENT

The Instant Fly Fighter

FLY LESS

Cavalor® FlyLess is a highly effective insect repellent spray to protect horse and rider against horseflies, flies, mosquitoes, ticks and other insects. The pleasant fragrance will make sure you can enjoy your summer ride to the fullest.

Key Ingredient

Cavalor® FlyLess contains **Icaridin (20,6 %)**, a repellent molecule registered for both human and horse. Icaridin forms a scented blanket on the skin, disrupting the mechanism that attracts insects to human and animal skin.

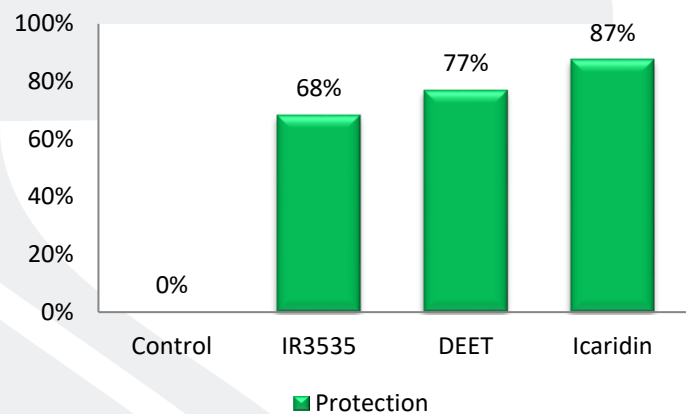

The **non-sticky, non-greasy** formula is gentle on the skin and won't harm or stain your clothing or gear.

Avoiding insects will also **avoid stress, itching, allergies and diseases from insect bites**. Because Icaridin doesn't kill the insect, the insect won't develop resistance to Cavalor® FlyLess.

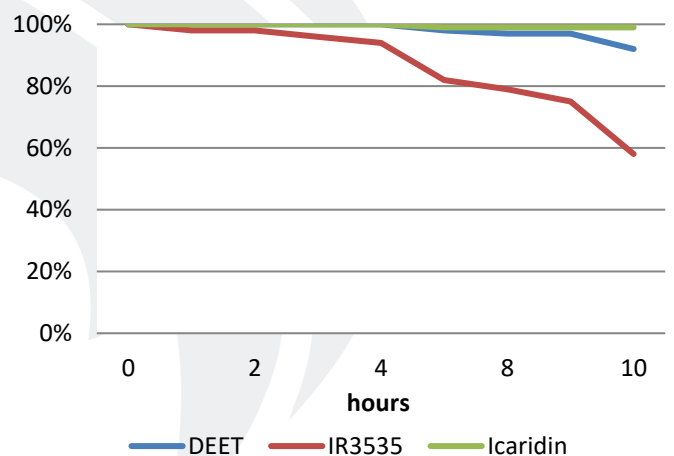

Studies have shown that formulations with 20 % icaridin protect humans for up to 10 hours and horses for up to 24 hours.

Average protection against mosquitoes (1)

Loss of efficacy against mosquitoes (1)
